## 1 Improvements/Additions to previous EMSs

# Improvements/Additions to previous EMSs

- Though Current EMSs have a lot of features, they lack some important features.
- It is heavily Internet depended. Only few offer a download/view online option .For most part downloading and viewing offline is not possible.
- Adding "View offline" option could be a lot advantageous for students.
- Unacademy provides practice quizzes but the accuracy again needs to be checked. There is no followup mechanism to challenge the answer key.

- Students and Faculty interaction only happens during online classes. Or students ask doubts in a FAQ type of thread available to them.
- For the most part no personal doubt clearance is given.
- A way for a student to clear his doubts directly from the faculty can be added.
- Most of the EMSs work on batch grouping. Making courses instead of batches creates more flexibility for learning.
- A feature for students/parents to see a teachers qualification in teachers' can be added.
